

GUHAN

Backend Developer

Phone : +91 9360028165

Location : Bengaluru

Gmail : mrguhan2302@gmail.com

GitHub : <https://github.com/Guhan11>

CAREER OBJECTIVE

Focused on expanding my knowledge and competencies to meet corporate objectives. Ready to apply my learning while gaining invaluable experience in the software industry

SKILLS

- Java - Springboot
- Database - MySQL
- JSON
- Swagger
- REST Api

TOOLS

- Spring Tool Suite (STS)
- Eclipse
- Visual Studio Code
- Git , GitHub
- Postman

AREA OF INTEREST

- Full Stack Developer

WEBSITES

- <https://guhan.vercel.app/>

Intern

- **Software Developer Trainee** at WhyDigit System Pvt Ltd, Bengaluru(3months)

Projects -1. AI VENT-Returnable Package

2. AI VENT-WH Management System

- **Web Development** at Code Bind technologies
- **Software Development** at Cafe Babe techologies

Education

B.E - 7.9CGPA

Computer Science Engineering

Anna University

NPR College Of Engineering and Technology, Natham
2019-2023

Project : Security System For ATM User Authentication

Description

Security System For ATM User Authentication was

designed for ATM users to improve security. Our security model would combine a physical access card and electronic facial recognition using a Deep Convolutional Neural Network and an unknown face forwarder mechanism

AI VENT-Returnable Package this project was created to cut down on packing waste. We oversee all kit specifics both on the client's end and in the warehouse. I worked on backend development, utilizing MySQL and Spring Boot to store and track the details.

AI VENT-Warehouse Management System this project was created for managing the kit warehouse at various locations. I worked on backend development, utilizing MySQL and Spring Boot to store and track the kits in different warehouse.
